

Ana Protulipac. After graduating from “Stanković” Music High School, where I attended Jazz department and Music theory department, I completed my undergraduate and then master’s studies at the Department for Psychology, Faculty of Philosophy, University of Belgrade, majoring in Industrial and Organizational Psychology. I continued my music career by performing music in several ensembles (“IrieFM”, “Katarina Pejak trio”, “Beyonce Tribute Band”...), as well as by creating my own music. As a psychologist, I started my career in the field of qualitative research in marketing, and then as a school psychologist working in Music School. Given the knowledge, experience and interests in the field of psychology, as well as in the field of music, I became interested in combining these two areas. In addition, I attend Gestalt psychotherapy education.
